

Carbon Management Planning Session

THURSDAY NOVEMBER 13TH AT 5:00-6:30pm

ECHA 2-150

If climate change is a real and pressing threat, how can government, industry and the public better manage carbon emissions?

The Energy Club will be hosting technical and policy experts from the Integrated CO₂ Network (ICO₂N) to discuss carbon capture utilization (CCU) and carbon capture storage (CCS) as possible tools for managing carbon emissions.

This event will include a brainstorming session, where students split into groups (public, government and industry) to discuss carbon management strategies.

FOOD AND REFRESHMENTS WILL BE SERVED

FREE ADMISSION
